PASSIVE FIXATION BIPOLAR PACING LEADS

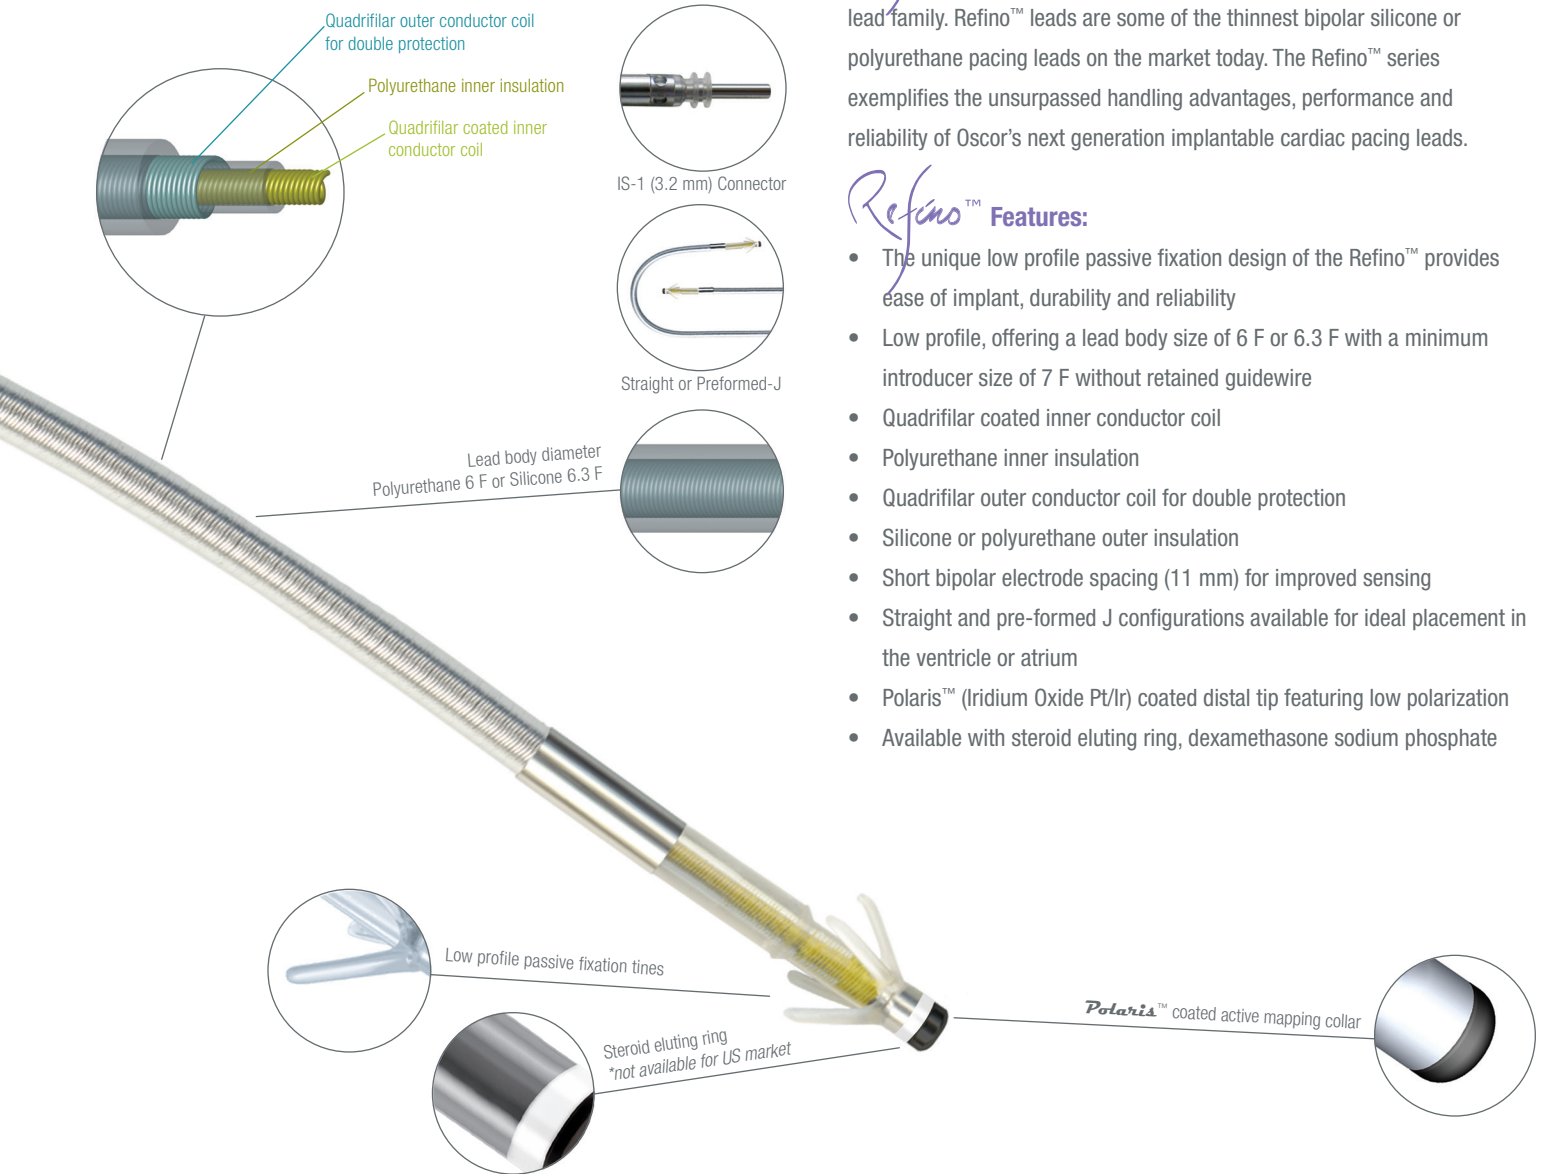

LATEX-FREE

Refino™ Bipolar Permanent Pacing Lead:

The Refino™ is Oscor's newest addition to our passive fixation pacing lead family. Refino™ leads are some of the thinnest bipolar silicone or polyurethane pacing leads on the market today. The Refino™ series exemplifies the unsurpassed handling advantages, performance and reliability of Oscor's next generation implantable cardiac pacing leads.

Refino™ Features:

- The unique low profile passive fixation design of the Refino™ provides ease of implant, durability and reliability
- Low profile, offering a lead body size of 6 F or 6.3 F with a minimum introducer size of 7 F without retained guidewire
- Quadrifilar coated inner conductor coil
- Polyurethane inner insulation
- Quadrifilar outer conductor coil for double protection
- Silicone or polyurethane outer insulation
- Short bipolar electrode spacing (11 mm) for improved sensing
- Straight and pre-formed J configurations available for ideal placement in the ventricle or atrium
- Polaris™ (Iridium Oxide Pt/Ir) coated distal tip featuring low polarization
- Available with steroid eluting ring, dexamethasone sodium phosphate
